To my fellow Physicians,

I am writing to recommend the services of Child's Play Autism Centers. Child's Play's lead clinicians, Rebecca Fulcher and Jason Shaw have proven themselves to be a major resource to our special-needs community for the 6 years I have known them. Their knowledge and attention to detail have aided in my patients' progress in mitigating deficits in development and greatly reducing multiple clients' extremely aggressive self-injurious behaviors.

I feel confident in recommending Child's Play's services to all my families with special needs.

They are not only thorough but also easy to work with and always willing to take the time to discuss my concerns, respond to questions, and provide clinical resources.

If you have any further questions, please feel free to contact me.

Regards,

Duane Hougendobler
